

Biochemistry (Biological Emphasis) Major

Professor: G. McNett

Associate Professor: B. Dhital, B. Hansert, D. Holliday, D. Schmidt

Assistant Professor: L. Strawsine, J. Morrow, M. Howell

Visiting Assistant Professor: R. Zumwalt

Contact: Dr. Dawn Holliday

Email: dawn.holliday@wcmo.edu

The Departments of Biology and Environmental Science and Chemistry offer an interdisciplinary major program of study to a Bachelor of Arts in Biochemistry. The major program is structured into two tracks, biological emphasis and chemical emphasis. The student to pursue

interests and professional goals. Both tracks require introductory biology and chemistry courses with emphasis on fundamental concepts and give students a clear insight into the underlying biological and chemical principles. The Biodiversity, Biological Processes and General Chemistry courses fulfill the general degree requirements for a course in Laboratory science as well as serving as foundation courses for biochemistry students.

Students completing a Biology or Chemistry major may not also receive a Biochemistry major. Students majoring in Biochemistry cannot obtain a second major or minor in Biology or Chemistry. Biochemistry majors may double major in One Health, but must do so in close consultation with the Department of Biology and Environmental Science.

The Departments strongly recommend that students majoring in Biochemistry (Biological Emphasis) take Calculus through Calculus II (MAT 124 and MAT 214) and Physics I and II (PHY 201 and PHY 212). Any student who elects to take BIO 404, Biochemistry, must have successfully completed both semesters of Organic Chemistry or be currently taking CHM 324/325. No more than four hours of BIO 398 Independent Study Research Projects, may be counted toward the major. Students must earn a letter grade of C- or better in all courses needed to satisfy major requirements.

Biochemistry Honors: This designation would be given for Biochemistry majors who meet the following criteria.

1. GPA 3.3 average for all BIO courses
2. Two semesters for independent, hypothesis-driven research
 - a) Preferable: A single project carried out over 2 semesters for a total of 4-6 hours of independent study
 - b) Alternatively:
 - I. Two single semesters for a total of 4-6 hours of independent study
 - II. A summer Research Experience for Undergraduates (REU) or similar type of research experience and a single semester (2-3 hours). These projects MUST be preapproved and must be accompanied by a formal campus presentation.

3. A formal thesis/paper that is evaluated by at least two faculty members
4. An oral or poster presentation at the Undergraduate Scholars forum or at a local, regional, or national conference

At least 50% of all BIO and CHM hours needed to satisfy the major (22-24) must be Westminster courses.

Course Code	Title	Hours	Semester	Grade
CHM 334/335	Analytical Chemistry I (lab required)	4		
CHM 344/345	Analytical Chemistry II (lab required)	4		
CHM 410	Advanced Topics in Chemistry	3		
CHM 434/435	Physical Chemistry II (lab required)	4		
CHM 404	Physical Chemistry for the Life Sciences	3		
CHM 424/425	Physical Chemistry I (lab required)	4		
Other Required Course (3-5 hours)				
MAT 114	Elementary Statistics	3		
MAT 124	Calculus I	5		
Total hours for Major		46-53		

If any substitutions or waivers of requirements are allowed, please list below and initial.
